Web Technology Specialist

Highly self motivated and goal-oriented professional committed to the development of successful web sites and web based applications. I offer over 10 years of analytical and problem solving skills, programming, database and computer proficiency, and the ability to follow through with complete project life cycles from inception to completion and continuing support.

Qualifications Summary

- Over 10 years working experience with proven expertise and time tested results.
- Self driven, self taught and self motivated, goal oriented team player.
- Web technology expert -- fluent in a broad spectrum of client and server software and hardware. Proven ability to quickly learn and apply new technologies.
- Clear performance in achieving usability and function without sacrificing creativity in projects.
- Produced start-to-finish products, such as web sites, web applications, intranets, extranets, CD games, 3D interactive product modeling, online ads and print material.
- Skilled in modular development; experienced in object oriented and procedural programming concepts.
- Experienced with Fusebox 4.1 coding methodology and the Fusebox Lifecycle Process (FLiP).
- Exceptionally well organized with strong work ethics and willing to work hard to achieve employer objectives.
